Dale Sheard Centre for Solutions in Women's Health
User Fee Schedule

The Dale Sheard Centre for Solutions in Women's Health has been made available through the vision and generosity of the partnership between, and donations from Alberta Health Services, the University of Alberta and the Royal Alexandra Hospital Foundation. This partnership is exemplified via their investment, along with the Stollery Children's Hospital Foundation, in the Women and Children's Health Research Institute (WCHRI). The intention is to have this center available for all women's and maternal health research (priority) and children's health research (depending on availability) at the Lois Hole Hospital for Women.

Fees will be charged for the use of the space and equipment. The goals of user fees are to:

- Encourage respect and careful usage of the centre, equipment and supplies;
- Provide cost recovery for consumables, along with growing an account to cover equipment repairs, and (eventual) replacement.

While it is important to charge user fees, it is also important to ensure that they do not become a barrier for use. Therefore, WCHRI has established a process to subsidize fees for WCHRI members in the absence of other funding. Contact Laura Reyes Martinez for details. Research centre users are required to include space and equipment usage fees as appropriate in grant application budgets (internal or external).

All user fees will be invoiced quarterly by AHS and are subject to change without notice.

Usage	Investigator-led Study	Industry-led Study
Non-interventional studies (e.g. Focus groups, chart reviews, etc.)	$5 per/hour	Fees to be assessed based on study parameters.
Interventional studies	$10/subject/visit
